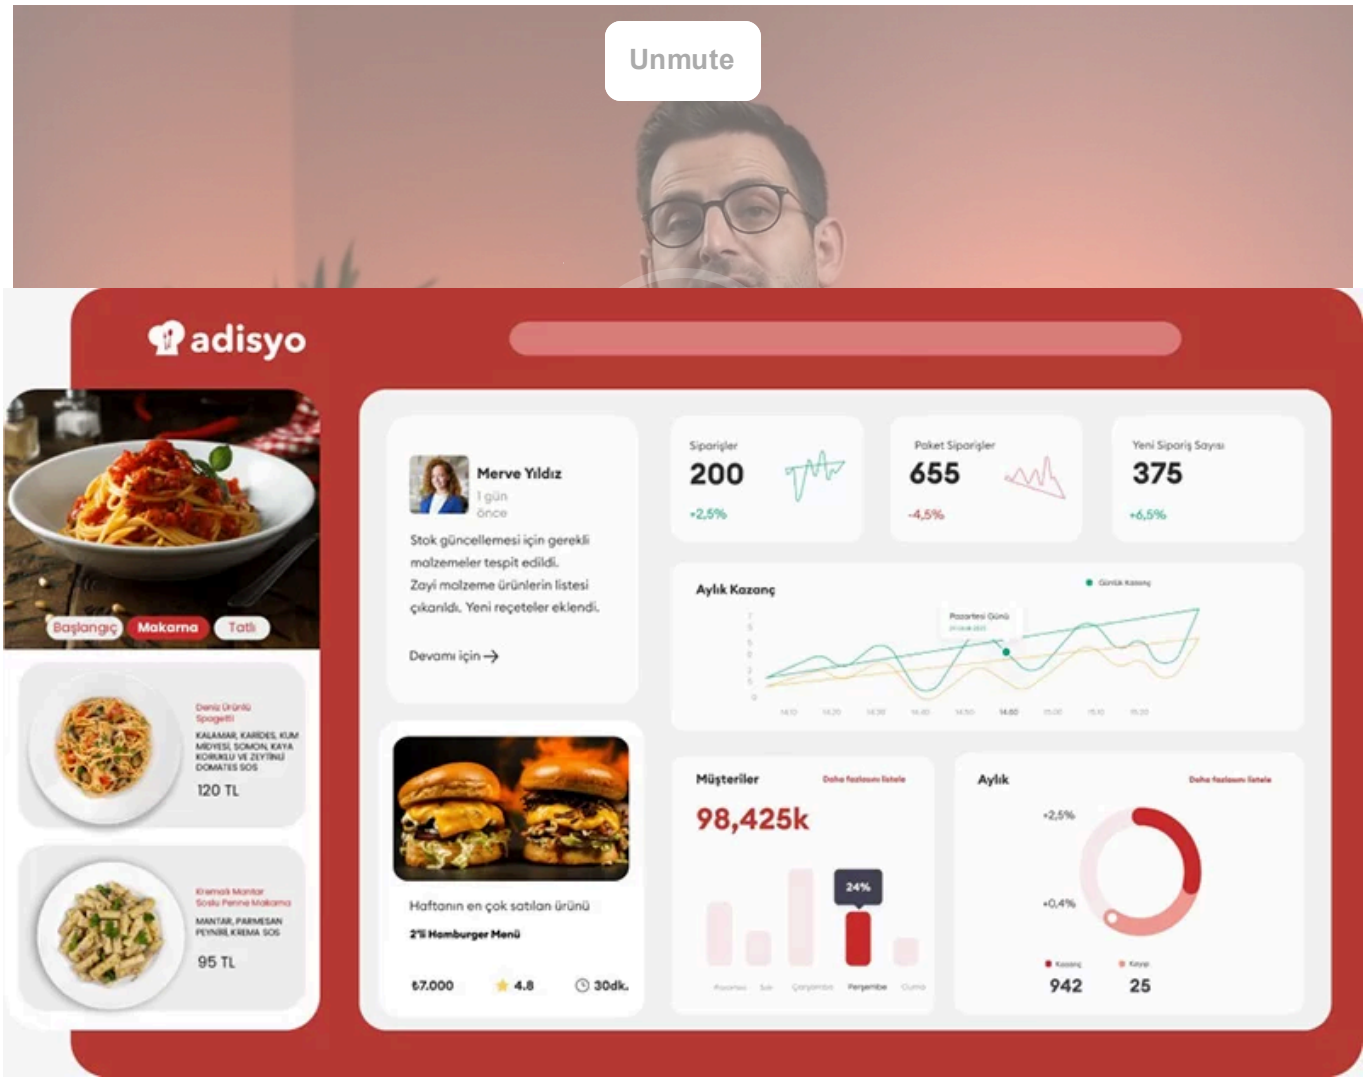
Qapera & Adisyo Integration

14 Days Free Trial



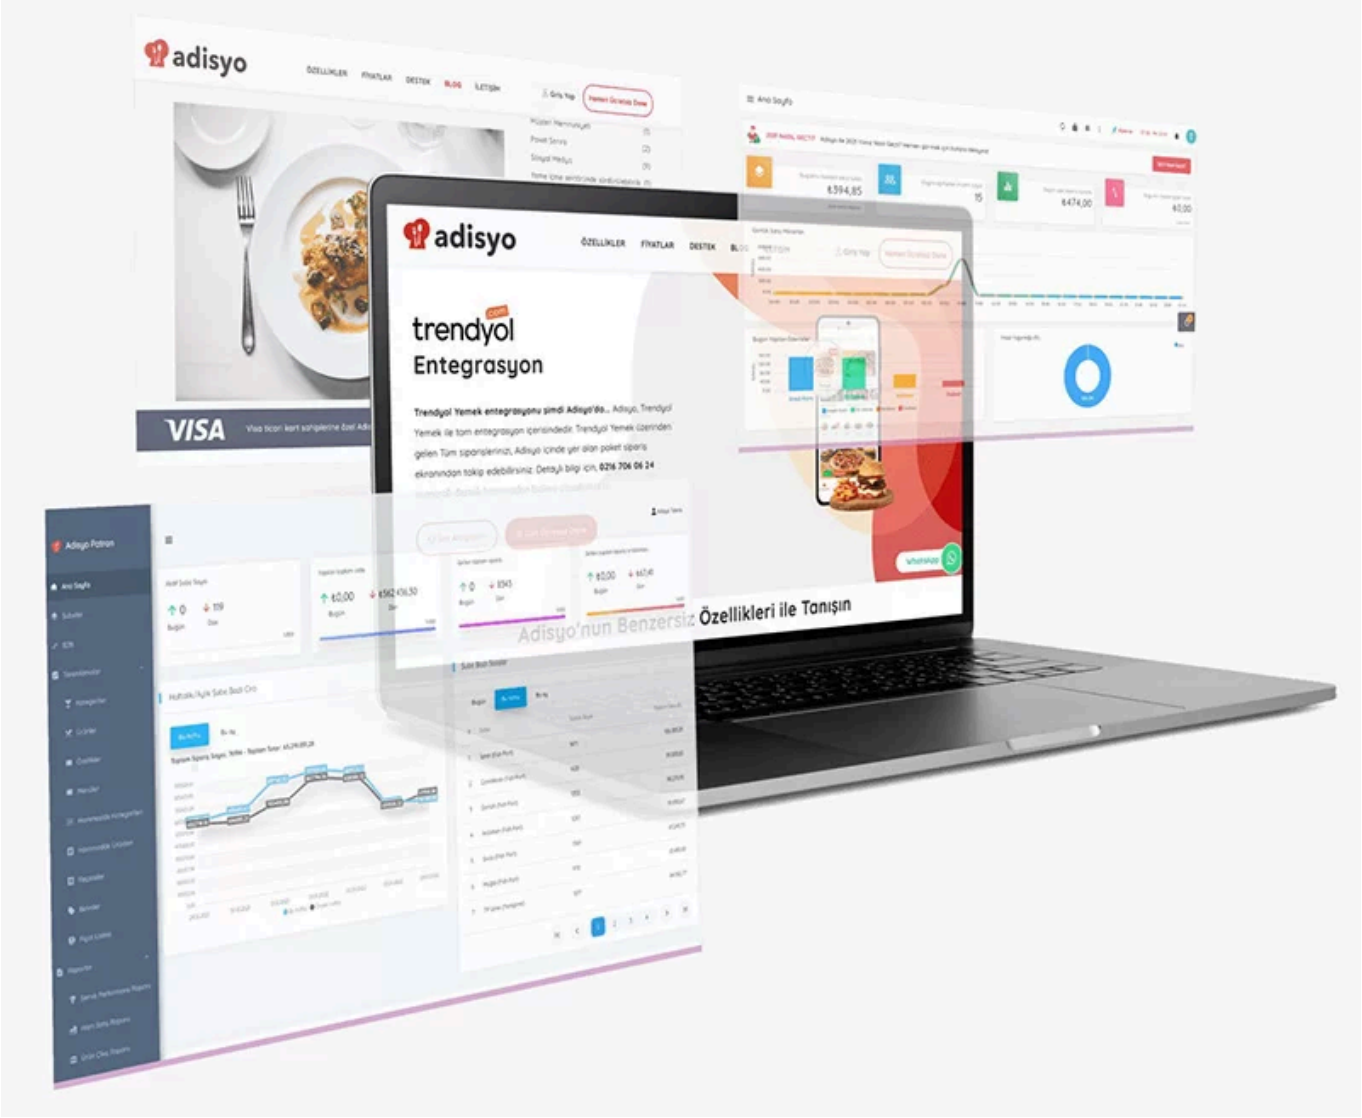
What does the Adisyo & Qapera Integration Offer?

The collaboration between Adisyo and Qapera offers unique opportunities to enhance your business management and profitability. Here are the values this partnership brings:

- **Integration Ease:** With Adisyo – Qapera integration, you can easily transfer crucial data such as sales products, extras, and revenue categories. This integration enables you to manage your inventory more efficiently.
- **Real-Time Inventory Tracking:** Sales made on Adisyo automatically deduct from the stock items in the Qapera inventory software. This allows you to track real-time stock levels and make quick decisions when needed.
- **Cost Analysis and Comparison:** You can view the cost of each sold product and compare it with revenue. This allows you to monitor your business's cost ratio, profit, and loss situation on a real-time, daily, and monthly basis.
- **Loss/Theft Analysis and Profitability Increase:** Through integration, you can determine the difference between actual consumption and theoretical consumption and identify losses or thefts in product-based terms. This is an important step in increasing your business's profitability.
- With Qapera's Central Production module, you can produce in one center and then transfer products to all your branches. Additionally, you can easily manage and track the entire production process in an understandable manner.
- **Product Mix Analysis:** You can compare sales and usage quantities with theoretical usage reporting and product mix (PMIX) data, enabling menu analysis and helping improve your sales strategies.

- **Management Ease for Multi-Branch Businesses:** With Adisyo, you can easily manage revenue-increasing strategies for your multi-branch businesses. Also, with Qapera integration, you can manage all inventory management processes such as stock, orders, supplier contracts, waste & loss management, counting, production & planning, consumption, etc., centrally, achieving an end-to-end solution.

This integration enhances your business's efficiency while allowing you to manage management processes more effectively. The collaboration between Adisyo and Qapera offers a powerful solution contributing to your business's success.



Qapera & Adisyo Integration Fee

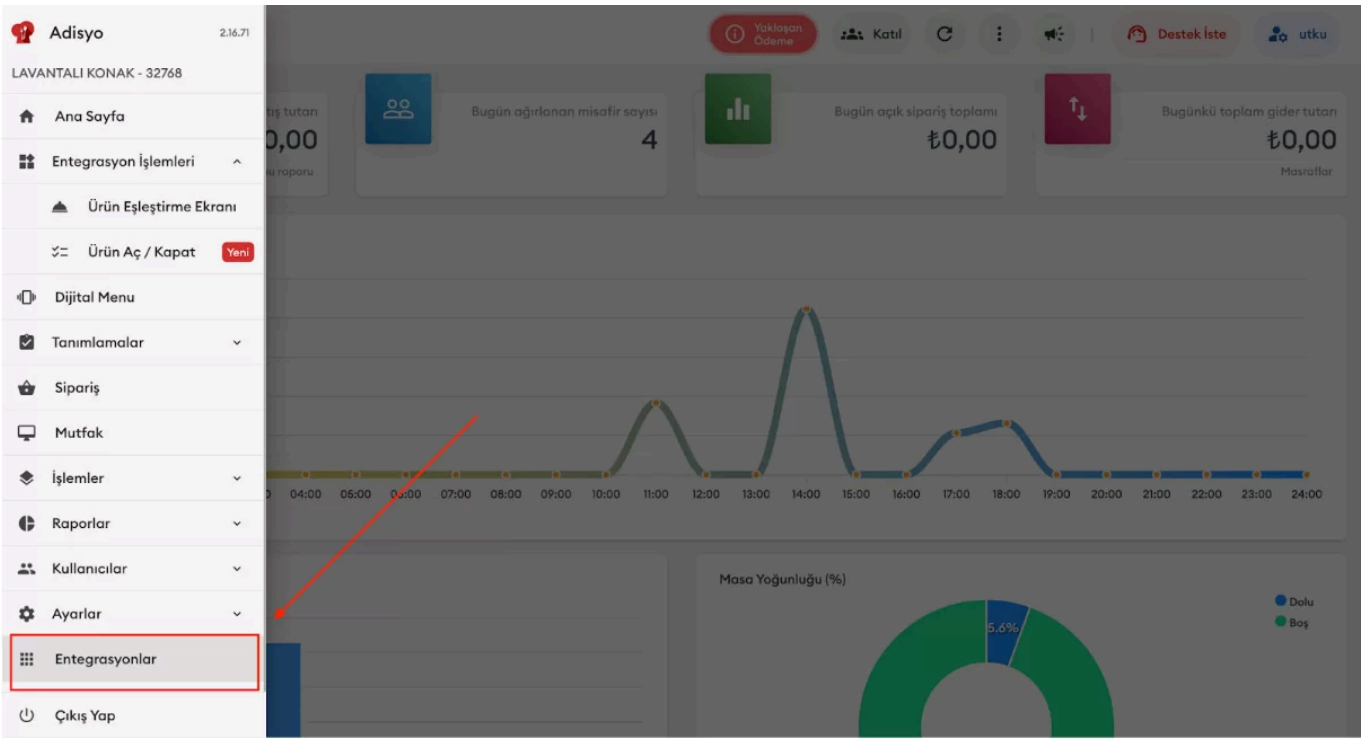
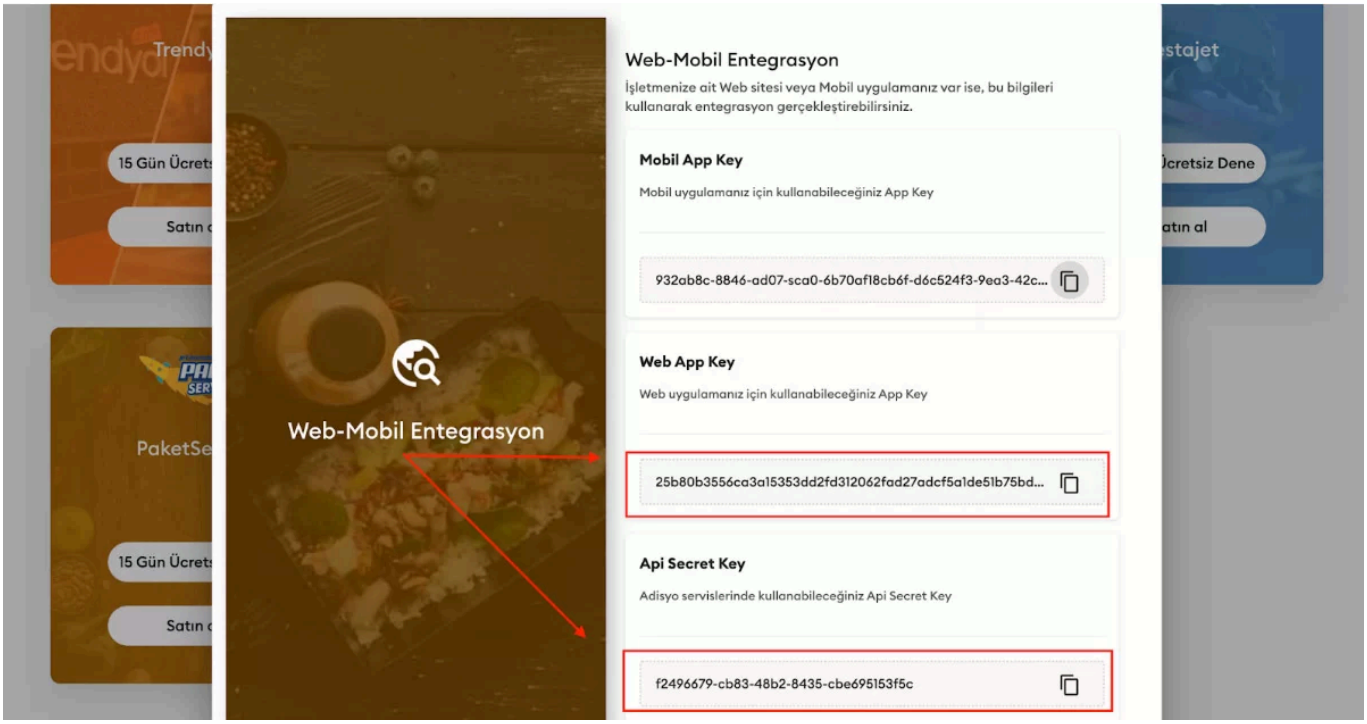
Qapera & Adisyo Integration Process

If you have a store in Qapera, you can access the necessary information for integration with the following steps:

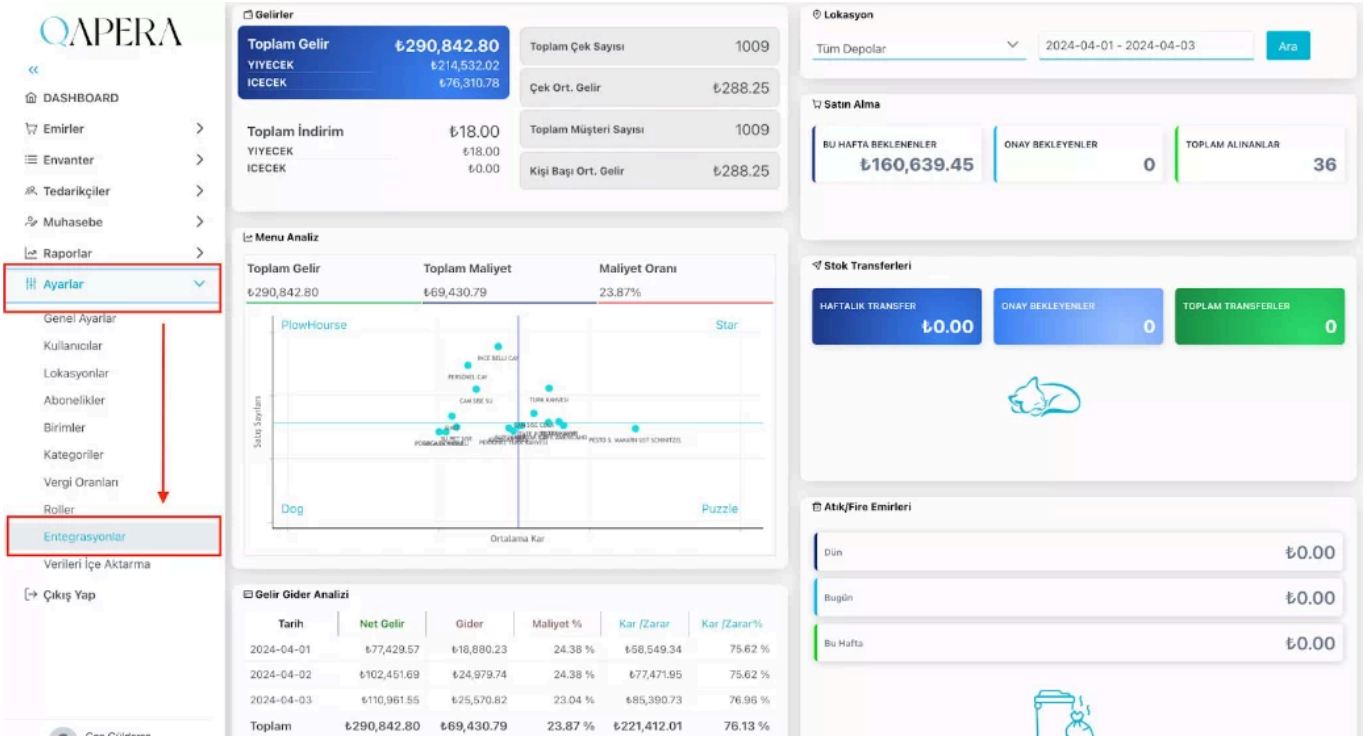
Step 1: Click on the 3-line icon at the top left of your Adisyo account. Click on “Integrations” at the bottom of the menu that appears.



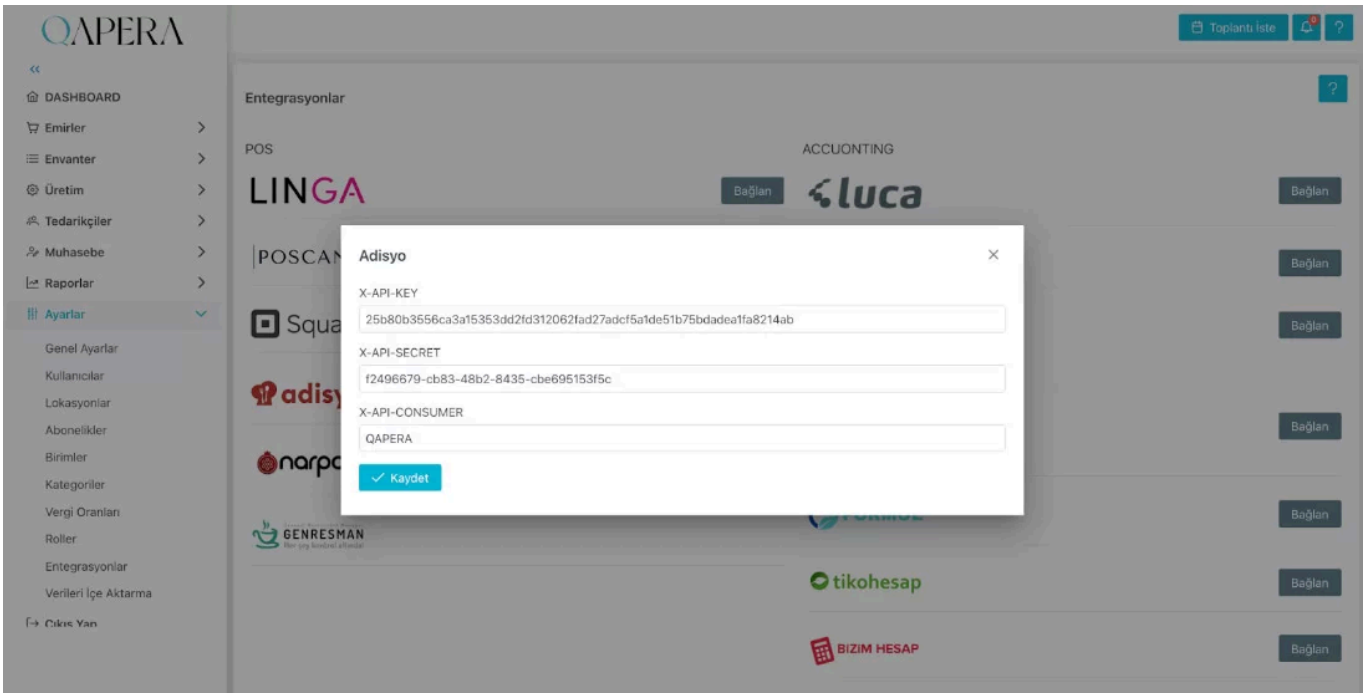
Step 2: Open “Web Mobile Integration” from the opened applications page and copy the Adisyon integration API codes.



Step 3: Log in to your Qapera account at https://app.qapera.com/login . After logging in, click on the “Settings” tab from the last menu and then click on the “Integrations” tab in the window that opens.



Step 4: Click on the connect button for Adisyo. Paste the API key obtained from Adisyo into sections 1 and 2 in the opened window. Write “QAPERA” in the section labeled “X-API-CONSUMER” in section 3, then click the save button. After this process, Qapera will be integrated with Adisyo.



Step 5: Update categories, products, and sales from the opened window. When you do this, all categories, products, and sales within the selected date range that you opened in Adisyo will be transferred to Qapera.

Step 6: Under the Inventory – Menu Items section in the left menu of Qapera, all sales items defined in Adisyo will appear. Any new menu items opened in Adisyo, price changes, product sales, and similar actions will

be instantly reflected in Qapera. When you create recipes for menu items transferred to Qapera, the quantities in the recipe content will be deducted from your stocks each time the product is sold.

Try now for 14 Days Free to digitise production processes and manage them end-to-end from a single screen with Qapera!
